Return item value	Type number (Numeric, float)	249.99	Refund value in South African Rand (ZAR). Must be > 0 with two decimal places. Includes VAT.
Return status	Drop down option (String, categorical)	Pending inspection, Approved, Rejected	Choose valid options only: "Approved", "Pending inspection", "Rejected", "In transit", "Received".
Refund method	Drop down option (String, categorical)	Cash refund, Bank transfer, Voucher	Choose valid option only: "Cash refund", "Store credit", "Bank transfer", "Voucher".

2. Customer
reviews data
dictionary

This data collects customers sentiment and satisfaction feedback on the website, App and other social media platforms linked to Stadioalot

Column name	Data type	Example	Additional information
Review ID	Unique ID (String, categorical)	REV-2026-11405	Unique identifier for each review generated by customer. Format: REV-YYYY-NNNNN. Column set as required field.
Product ID	Inique ID (String, categorical)	NIK-SHOE-009	Specific roduct reviewed by cusomter must exisit and match the product catalogue. Column set as required field.
Customer ID	Unique ID (String, categorical)	CUST-11024	Customer who wrote the review must have match the customer prfile in the master file. Column set as required field.
Review date &time	Date & time	10/03/2024 9:45	Date and time review was posted. Format: yyyy-MM-dd hh:mm:ss. Must be on or after the sales date. Column set as required field.
Star rating	Scale 1-5 stars (Numeric, integer)	5	Rating from 1 to 5. Valid values: 1, 2, 3, 4, 5 only. Column rule set to no decimals and no nulls permitted.
Review text	Open commentary (String, text)	"Product arrived damaged."	Free text allowed with emojis. Length limit set at 10–1000 characters. May contain emojis. All languages allowed.
Verified buyer	Yes/ No (Booleen)	Yes	Whether the review is from a verified buyer. Valid values: "Yes", "No".

3. Delivery data disctionary

This data monitors the transit of ordered packages departing from warehouses

Column name	Data type	Example	Additional information
Delivery ID	Unique ID (String, categorical)	DEL-2026-04421	Unique identifier generated by system for tacking shipping. Format: DEL-YYYY-NNNNN. Column set as required field.
Order ID	Unique ID (String, categorical)	ORD-2026-55412	Unique identifier generated by the system automatically by connecting to the sales invoice for the original order. Must exist in the sales transaction table. Column set as required field
Dispatch date & time	Date & time	08/03/2026 8:30	Date and time order left warehouse. Format: yyyy-MM-dd hh:mm:ss.
Expected delivery date	Date & time	12/03/2026 17:00	Promised delivery date. Format: yyyy-MM-dd hh:mm:ss.

Actual delivery date	Date & time	14/03/2026 15:45	Date and time of actual delivery. Null if not yet delivered.
Delivery location	Type location address (String, categorical)	Pretoria, North, extention 12, Berg street.	Province of delivery address typed. Length limit set to 10- 10 000 characters. Column set no no decimal and no null permitted.
Delivery status	Drop down option (String, categorical)	Delivered, Not Delivered	Valid values only: "Delivered", "In transit", "Failed to deliver", "Returned to retailer".
Courier Partner	Drop down option (String, categorical)	DHL express, FedX	Third party loaded on system for handling transit. "DHL Express", "FedX", "Internal Fleet", "Third-party logisiitcs".

4. Inventory sheets

This data tracks real-time physical items currently stored across warehouse centers

Column name	Data type	Example	Additional information
Inventory record ID	Unique ID(String, categorical)	INV-2026-90912	Unique identifier. Format: INV-YYYY-NNNN. Column set as required field.
Product ID	Unique ID (String, categorical)	NIK-SHOE-009	Specific roduct reviewed by cusomter must exisit and match the product catalogue. Column set as required field.
Stock on hand	Whole number (Integar)	150	Count of physical stock on hand. No decimals permitted.
Warehouse location	Drop down option (String, categorical)	WH-JHB-01	Warehouse identifier. Choose valid values only: "WH-JHB-01", "WH-JHB-02", "WH-CPT-01", "WH-DBN-01". Column set as required field
Reorder point	Numeric, integer	100	Minimum stock before reorder. Must be ≥ 0 .
Expiration date	Date & time	30/09/2025 0:00	Product expiry (where applicable). Null for non-perishable products. Format: yyyy-MM-dd hh:mm:ss.
Courier Partner	Drop down option (String, categorical)	DHL express, FedX	Third party loaded on system for handling transit. "DHL Express", "FedX", "Internal Fleet", "Third-party logisiitcs".
Storage cost per unit	Type number (Numeric, float)	249.99	Cost value in South African Rand (ZAR). Must be > 0 with two decimal places. Includes VAT.
Handling cost per return	Type number (Numeric, float)	249.99	Cost value in South African Rand (ZAR). Must be > 0 with two decimal places. Includes VAT.

5. Return policies

This data stores official rules governing items brought by customer

Column name	Data type	Example	Additional information
Policy ID	Unique ID (String, categorical)	POL-2026-001	Unique identifier. Format: POL-YYYY-NNN. Each customer ID is automatically allocated Policy ID for all purchases made. Column set as required field.
Product category	Drop down option (String, categorical)	Electronics, accessories, furniture	Category the policy applies to. Valid values: "Electronics", "Home & Garden", "Fashion", "Beauty", "Sports", "Toys", "Books", "All". Column fset as required field.
Return window (days)	Whole number (Numeric, integer)	30	Number of days allowed for returns. Must be ≥ 0 and ≤ 365 . Column set as required field.
Policy text	Open commentary (String, text)	"Electronics may be returned within 30 days..."	Full policy text. Free text. Length limit set to 10- 10 000 characters. Column set no no decimal and no null permitted.
Effective date & time	Date & time	01/01/2024 0:00	Date policy came into effect. Format: yyyy-MM-dd hh:mm:ss.
Electronic signature	Yes/ No (Booleen)	Yes	Customer accepting terms and conditions upon clicking accept or decline. Values translated as: Accpet= "Yes", Decline= "No".
